28/06/2017

Exploring the Roman Thessaloniki

04/07/2017

The Rotunda, the Roman Forum and the Ancient Agora Museum

Family Moments at IHU Campus

Last day of lectures …

The "IHU" experience…

" The participation at the Summer School in Ancient Technologies and the Voyage of Luxuries **was the best, fruitful decision I made this summer. The lectures, and of course the lecturers, were amazing.**
I learned so many new things about technology and how it is function. But mostly important is that I had the opportunity getting to know new people who were very inspiring and spend with them two wonderful weeks in Thessaloniki, which is an amazing cultural city. "

Thank you so much for that experience ;)

Josephine Mair,
Primorska University,
Slovenia

The "IHU" experience…

" As a participant in the 5th International Summer School, I would like to congratulate Dr Georgia Aristodemou and Dr. Anna Michailidou for organizing this program that I really enjoyed. These two weeks were a great experience for me because **not only I learned many things about Ancient Technology and the Voyage of Luxuries but, I also enjoyed the company of all participants**.

Having contact with people from all around the world gave me the privilege to learn more about other cultures. Lastly, I think that participating in such a program is **a great opportunity to learn many things from experts is short time**. "

Pavlos Ainatzidis
University of Ioannina, Greece

The "IHU" experience…

" Anyone who is interested in understanding the ancient world will benefit from the seminar on ancient technology held at The International Hellenic University in Thermi, just outside Thessaloniki. […]. The seminar is bound to affect the way I teach Greek civilization; I am now much more comfortable talking about ancient technology and will be able to incorporate it much more completely in my lectures. […].

Drs. Anna Michailidou and Georgia Aristodemou assembled a seminar, supplemented by trips to multiple museums, that far exceeded my expectations. My students will be the ultimate beneficiaries of my time at IHU. Having the opportunity to meet and listen to a large group of superb scholars such as Drs. Tasos Tanoulas and Vasilis Petrakis makes the program well worthwhile.

I learned far more in two short weeks than I could have in months of reading.

I have many new friends in the scholarly community in Greece, and I also had the opportunity to meet students from all over the world. All that in addition to enjoying the wonderful city of Thessaloniki! **I strongly encourage anyone involved in teaching the ancient world to come to The International Hellenic University for the seminar on ancient technology**. "

Timothy Winters
Professor of Classics
Austin Peay State University, USA

The "IHU" experience…

"The summer school of ancient technologies held by IHU and organised by Drs G. Aristodemou and A. Michailidou **has been a life changing experience, thanks to the impulse it gave me towards my future thinking**.
My mindset and academic approach changed thanks to the opportunity to spend quality time with leading academics in the field of archaeology. […]

Besides that, **I gained knowledge about both ancient technologies, but also modern technologies applied in archaeological studies**.
The summer school covers a broad area of expertise from Linear B linguistics, to the production of glass and faience as well as the philosophical frame of the whole approach given by prof. Tassios at the beginning of the course.
This, combined with all the participants, who form a nice group of people with similar interest and make a great environment to have fun in a beautiful Greek city**, is a mind blowing experience**.
I would recommend it to everyone with no hesitation! **I myself attended twice and still believe that I haven't had enough of it after making great friendships and learning awesome things**".

Andromeda-Ludmila Liberiou,
Charles University, Prague

Enjoying Thessaloniki…

Thank you all
for being part of this wonderful experience…
